

Welcome to the DarkGalaxy Manual

Welcome to the Dark Galaxy Manual project.

This project exists to allow the community to assist with the creation of a game manual, in a generally central location, designed to ease general contributions, with a relatively quick update time.

Firstly, a couple of ground rules.

- Please keep all documentation as concise as possible, using clean understandable language.
- Use of screenshots is allowed, but please focus only on the item being documented (Win + Shift + S may help you)
- No direct instruction. We would like players to discover things for themselves, feel free to provide options, guides etc, but do not provide anything explicitly telling them what they should do, such as build orders.

Revision #3
